

## Journal Club Template

### Purpose:

Physician Assistants (PA) need to regularly critically evaluate scientific literature that directly affects our field of medicine and patient care. A journal club provides practitioners a setting to efficiently review and synthesize clinically relevant information (articles, conferences, lectures).

### Procedures:

1. Presentation on topic of interest. Topic will vary in subject and content including case studies. Interested individuals will be solicited to contribute.
2. In-attendance and remotely-connected members will present either:
  - A recent publication, 2018-2019 (JAMA Dermatology or JAAD are strongly encouraged)
  - Summary/Pearls of recent conference attended (Philly Derm included)
3. All members will listen appropriately and interact supportively.
